Title of Thesis:

Spatial Analysis of Urban Transportation system by cars in the city of Zubair (A study in geography of Cities)

Abstract:

Transportation Is Defined As The Tool That Reflect Development And Advancement Of People. The For The Aim Of This Study Is To Highlight The Problem Of The Unstable Transformation In The City, City Zubair Lies In The Western Part Of Basrah Governorate And It Is The Administrative Centre Of The District Of The City Of Zubair Lt Has An Important Strategic Location Because It Links The Western Upland With The Alluvial Plane Lt Covers An Area Of 4390 Hectares And Is Divided In To 8 Sectors And 23 Quarters With Population Of 382384 In 2015 The City Had Come Across Different Stags Throughout Which Transpiration Developed During The First Phase There Were No Cars, That Was The Case Till 1921 When Cars Were Used Later There Was A Need For More Straight Streets And Roads Because This Was An Important Prerequisite In The Hierarchial Design Of Any City, This Was Also Important Because It Occupied A Proportion Of The Land Because Of The Expansion In The Area And The Growth In Population Resulting From Mmigration To The City And Building New Residence Quarters The City Had A New Pattern For The Streets Especially In The Eastern And Southeastern Parts Also The City Was Connected By A Net Of Pared Roads To The Oil Fields.
